A Roof Grows in Brooklyn: The Do-It-Yourself Green Roof Workbook

No matter how small your roof or budget, this comprehensive workbook enables every reader to plan, design, and build a do-it-yourself green roof of their very own.

The complete process from inspecting your existing roof to weeding your green roof installation is illustrated chapter by chapter.

Design, installation, checklists, maintenance and hardcore money saving tips are all included to make your do-it-yourself installation a success!
